## Money Matters

For the last two years, all P&C fund raising has focused on building a sum of money large enough to pay for fixed equipment for the 3-6 play ground. Your support of the various activities they host is tremendous.

The canteen continues to be a great fundraiser for the school, thanks to the dedicated volunteers. Also a huge thank you must go to Rachael Coulton for the hours she dedicates to the uniform shop. Not only is the service valued by parents at our school and Murrumburrah High, it is also a great fundraiser for the students at MPS.

Raffles, the Mothers' Day stall, the Facebook auction, canteen stalls at carnivals and many other events all take time and effort which adds to the total amount required to purchase the equipment.

### Parent Payments

Due to the upcoming LMBR launch at Murrumburrah Public School we will not be accepting parent payments online or through the office for the next week, starting today and concluding Monday 22nd May.

### Front office closed

With the launch of our new administration and finance systems fast approaching, please note that our school office will be closed on Monday, 22nd May for LMBR Go Live day. It will resume operation on Tuesday, 23rd May. Sick bay & urgent calls will be taken as usual.

# TOWN

Taking Off with Numeracy for 3G and 4L classes is a great hit with the students. 10 minutes is spent daily, supported with extra teachers and an SLSO, for students to practise and develop mental strategies to add and subtract 2, 3 and 4 digits and develop a deep understanding of place value of four and five digit numbers.

The students are enthusiastically engaged in the practical activities that challenge their thinking. Initially, students rolled dice with 2 to 4 digit numbers and stated the number before and after as well as 10 before and after. When a student achieved this learning intention, students were then challenged to record numbers 100, 1000 and 50 before and after the number rolled. On the other hand, some students may require visual prompts and other devices to support their learning. The support in this activity was the use of a personal number chart.

Learning intentions for these sessions are based on the mathematics syllabus and the NSW Numeracy Continuum. Plotting these markers of progression on the Numeracy Continuum strongly supports the practice at MPS whereby students are engaged at the point of new learning.

The collaborative culture in TOWN supplements the Prime Maths books that all students in Year 1 to 6 are involved in to provide a consistent approach to Mathematics across the primary years.
